EDUCATION

University of Michigan School of Information, Ann Arbor MI, Master of Science in Information Sep. 2025 - Apr. 2027

- **Relevant Coursework:** UX Design & Research, Accessibility & Inclusive Design, WCAG Principles, Human-Computer Interaction, User Research Methods, Web Design & Development
- **GPA:** 4.0

Calvin University, Grand Rapids MI, Bachelor of Arts in Graphic Design

Sep. 2019 - Dec. 2023

PROFESSIONAL EXPERIENCE

U-M ITS Accessibility Team, Ann Arbor MI, Student Accessibility Specialist (Part Time) Feb. 2026 - Present

- Conduct automated and manual testing of digital products using Axe, Siteimprove, and NVDA screen reader to ensure compliance with WCAG AA Guidelines.
- Built [a11y-crawler](#), a Playwright-based tool that systematically extracts and records WCAG 2.2 AA violations from all pages and DOM states of third-party web products, accelerating the automated auditing process.

Reentry Reimagined, Grand Rapids MI, Software Developer & UX Designer (Contract) Apr. 2024 - Dec. 2024

- Built and shipped [ReentryGuide GR](#) as lead developer to help formerly incarcerated individuals access food, clothing, healthcare, and other essential services, deploying to a community pilot group.
- Translated weekly ethnographic insights into immediate design pivots by iterating on UI/UX in real-time during a 3-month immersion with a formerly incarcerated community (C.L.E.A.R.).
- Eliminated 2 critical navigation blockers through redesigned information architecture and new onboarding flows by conducting 2-round usability testing with 5 participants (Nielsen Norman Methodology), including users with autism and low digital literacy.
- Designed a high-affordance design system blending iOS patterns with Microsoft Fluent depth cues to improve clickability and clarity for users with low digital literacy.
- Authored [developer documentation site](#) using Docusaurus to support open-source contributions.

Kosmos Stargazing Resort & Spa, Alamosa CO, Web Developer (Contract, Remote) Jan. 2025 - Aug. 2025

- Developed and maintained kosmosresort.com using JavaScript and Webflow CMS, serving ~6,800 monthly visitors; improved UX to reduce bounce rate by 10%.
- Improved site-wide typography and color contrast to meet WCAG 2.2 AA standards, fixing critical font sizing and legibility issues across all pages.
- Reduced development scope 80% by proposing a deep-linked [JS booking calendar](#) widget integrated with Mews (vs. a full custom build), enhancing booking experience.

RESEARCH EXPERIENCE

Screen Reader Conversational Interface for BLV Users, SI 552 Research Proposal Mar. 2026 - Present

- Conducted a [literature review](#) of 20+ papers across HCI and accessibility research to identify 4 underexplored gaps in LLM-assisted information access for blind and low-vision (BLV) users: LLM-enabled navigation efficiency and preferences, bias in AI-generated image descriptions, context-dependent alt text evaluation metrics, and methods for mitigating AI harm without undermining accessibility gains for BLV users.
- Proposed a comparative between-groups study (N=20) measuring information loss, task efficiency, and AI bias exposure for BLV users interacting with NVDA + GPT-4 powered conversational interface, with an accessible dissemination plan conforming to WCAG 2.2 AA.

SKILLS

Development Skills: WCAG/Accessibility, JavaScript, TypeScript, React, React Native, Python, HTML, CSS, Agile/Scrum

Design Skills: User Experience Design, Web Design, Responsive Design, Prototyping, Usability Testing

Tools & Platforms: Axe, Siteimprove, NVDA, Vercel, Git, GitHub Actions, CI/CD, Generative AI

Languages: English, Mandarin Chinese
